[UHW015 Bulk Liquid Dispenser]

Rapid and accurate dispensing of larger volumes of a single liquid reagent such as growth media and buffers into multi-well plates. Optimized for speed and efficiency in plate preparation tasks.

[UHW030 Nanoliter Liquid Dispensing]

Specialized for high-precision dispensing of extremely small liquid volumes, typically in the nanoliter range. This unit operation reduces reagent usage, minimizes waste, and allows for scalable, cost-effective workflows, particularly in high-throughput screening applications.
